Two permits are required for replacement or repair of an existing or installation of a new dock; one from Stevens County Planning and one Washington State Fish and Wildlife Department (WDFW). You will need to also attach a JARPA application which is used by both agencies. Please complete the underlined portions on the form. Both departments also need a site and construction plan. If you have any further questions, please feel free to contact us.

The site plan should show:

- Dimensions of the existing and proposed construction
- Distance from dock to the side property lines
- Distance from the dock to docks on adjacent property
- Length and width of dock

The construction plan needs to show:

- Type of materials used
- Construction plans

Typically, the County requirements for a dock are as follows:

- Setback a minimum of 10 feet from the side property lines.
- Portion in direct contact with the water shall not be treated or coated with biocides such as paint, pentachlorophenol, creosote, or other toxic preservation treatment.
- Floation (Styrofoam) shall be enclosed and contained to prevent break-up or loss.
- Not to exceed three feet above, on the landward side, of the OHWM.
- Boating facilities should be located, designed and operated to minimize adverse effects upon shoreline vegetation, fish and wildlife habitats.
- Piers, docks, floats and mooring buoys should be designed to minimize interference with navigable waters and the public's use of the shoreline.
- Bulk storage (fixed tanks) of gas, oil or other petroleum products is prohibited.
- No fill will be placed below the ordinary high water mark (OHWM).
- Maintain the natural vegetation as much as feasible.
